

## Customer Prep List Prior to Bed Bug Treatment

\_\_\_\_ 1. Day of Treatment - Following items need to be placed in sealed garbage bags or totes and ran through single dryer cycle on high heat (preferably laundromat):

All clothing from closets, drawers, etc

All bedding (sheets, comforters, blankets, pillow cases, etc)

All other fabric material that can be heated (stuffed animals, soft dog/cat toys, etc)

\_\_\_\_ 2. Empty out all other non-fabric items from dressers, closets, night stands, etc & place in sealed plastic totes or bags, neatly organized away from furniture to be treated

Items may include:

Alarm clock, remote control, framed pictures, etc

If bed bug evidence is found on/in these items, we may treat these items with Pest strips that will be placed inside the bag/tote containing customers' property.

\_\_\_\_ 3. Prior to Boo's Bug Stoppers arrival, make sure apartment is clean and tidy. All loose items must be picked up off of the floor.

\_\_\_\_ 4. Run Vacuum cleaner prior to treatment. Empty contents into garbage and remove from house. Clean vacuum cleaner thoroughly

\_\_\_\_ 5. Pets need to be kept in cages/carrying crates or kept out of the house during treatment & for 4 hours after treatment is completed to allow spray to dry.

\_\_\_\_ 6. Tenant must stay out of the unit for 4 hours after the treatment is completed to allow spray to dry.

\_\_\_\_ 7. Highly recommended (but not necessary) for customer to purchase bed bug resistant mattress covers and properly install them over infested mattresses and box springs.

**\*\*NOTE – Success of the treatment depends on customer cooperation to prepare properly and complete this list in its entirety. Boo's Bug Stoppers does not guarantee the complete elimination of Bed Bugs with a single treatment. Follow up treatments may be required.**
